

Sewer Repair Update

Work on the sewer has wrapped up for the week and repairs have progressed fairly well. Contractors have had to use ripping equipment leading up to the corner by lot 41 because of excessive frost and massive areas of clay. They will be starting on installation of a new manhole to improve drainage on Monday and then proceed up Loop 1. The BOD will continue to inform owners of progress through the week but at this point it looks unlikely we will have water for the long weekend. It is not a message we want to pass on but feel it's best to be upfront and not have everyone wondering. Loop 1 and 5 are still without sewer use. We will continue to keep you all informed.

A Couple of Other Reminders

We have a long weekend coming up. No fireworks are to be let off within the park at any time and that message is especially important this year since we do not have water yet. Please also be very cautious with campfires.

Many owners are beginning spring lot cleanups and everyone appreciates how that affects the esthetics of our park; however, please remember to take your pine cones etc. to the Town of Sundre compost area and refrain from filling the park waste bins with compostable material. Also just a reminder that no waste material is to be left on top of or on the ground around the waste receptacles. Thank you

Upcoming Events

June 1st - AGM - 1:00 pm Clubhouse

June 8th - Work Party to prepare for the front maintenance shed. Meet at the front washroom facility at 10:00 am if you can help out.

July 5th - Work party to begin construction of the front maintenance shed. Details TBA.
