

Riverside RV Village

May 5, 2020

The Board of Directors would like all owners to understand that we are working to get Riverside open as soon as possible. Please review the following guidelines issued by AHS which we are following. Until point #1 is met we are unable to fully open.

Please note: AHS can change the guidelines and/or rules for camping for 2020 at any time. Right now we advise you to stay home and stay healthy. You can use this information to plan now, but go later.

April 30, 2020 Update:

Alberta Government has announced an opening-soon plan for businesses. This week we also received an update on guidelines for Campgrounds. With the announcement made yesterday, Private and Municipality operated Campgrounds are still allowed to remain open but will still have to follow the new AHS guidelines in order to operate (see below). Alberta Health Services recommends that only facilities that offer long term (seasonal camping) (greater than 4 weeks) and where the sites are primary accommodation for users should consider remaining open.

Please be advised that these are recommendations and are subject to change. Campgrounds that remain open should only do so under the following practices (guidelines):

- **Self-contained camping only.** Including own continuous water supply (e.g. connected to municipal service), sewage holding tanks or otherwise connected to sewage services, and personal washroom facilities such as RV's and travel trailers.
 - **Close all shared washroom facilities including showers.**
- **Laundry facilities must be restricted to a single user at a time and high touch surfaces must be disinfected between uses. Users should avoid shaking of dirty laundry prior to washing.**
- **Water fill stations must be controlled by the operator practicing proper precautions.**
- **Campground capacity limited to 50%, utilizing every other campsite for spacing. Only one camping unit per site.**
- **Exceptions to 50% spacing may be considered for properties with sites that are greater than 9 meters (30 ft) wide and for properties where the sites are individually owned or on long term leases.**
- **Group camping is prohibited.**
- **Common buildings should be closed and recreational activities including but not limited to: playgrounds, swimming pools, water spray parks, water activities, boat rentals, train/tractor rides, hay rides, mini golf, games rooms, arcades, go-karts, amusement rides, gym facilities, and group sports/courts and any rental equipment are prohibited.**
- **Organized activities such as bingo, karaoke, exercise classes, garage sales and the use of social halls are prohibited.**

- **Social gatherings such as group bonfires, potlucks, happy hour, etc. are prohibited.**
- **Beaches to be assessed closer to bathing season.**
- **Avoid direct contact with campers (e.g. remote check in).**
- **Provide information to campers about social distancing during check-in and check-out times. Post signage with rules and COVID precautions.**
- **Residents who are required to self-isolate due to international travel, contacts or symptoms must stay in their RV or on their own campsite/pad.**
- **Cleaning and disinfecting must occur according to a defined schedule and following AHS environmental cleaning recommendations. High touch surfaces are a priority for cleaning and disinfection.**
